PROFILE

Computer Science with Mathematics student and community leader with experience as President of Quarters Christian Youth (QCY), OAU Staff Quarters. Brings experience in community communication, planning and coordination, alongside teaching and technical work that requires organisation, collaboration and clear explanation.

EDUCATION

Obafemi Awolowo University (OAU)
Computer Science with Mathematics, Department of Computer Science and Engineering
Expected completion: 2026

CORE SKILLS

Leadership: Community leadership, programme planning, coordination, communication, volunteer engagement

Working with people: Team collaboration, learner support, mentoring approach, clear written communication

Technical foundation: Computer Science, web development, data analysis, ICT education

Organisation: Activity planning, schedules and responsibilities, follow-through

EXPERIENCE

Technophile Academy | Tutor — October 2026 – Present

- Teach introductory HTML and CSS, covering page structure, links, tables, forms, media, semantic and grouping elements, and basic styling.
- Guide learners through practical assignments, code corrections and implementation.

Overcomers Kiddies Academy | Teacher — May – July 2026

- Taught ICT to primary-school pupils, adapting foundational computer topics and activities for young learners.
- Teaching materials describe computer fundamentals, input/output devices, keyboard and mouse use, files, typing, digital drawing and introductory coding.

ACE, OAU | Intern — April – September 2025

- Internship experience in a data-focused team at the African Centre of Excellence, OAU; the available portfolio describes exposure to institutional information systems and data work.

INTECU, OAU | Intern — August – September 2024

- Internship with the Information Technology and Communication Unit at OAU, with exposure to IT and networking work in a university environment.

COMMUNITY LEADERSHIP

President, Quarters Christian Youth (QCY), OAU Staff Quarters. The portfolio describes providing direction, coordinating people and activities, communicating expectations, encouraging participation and supporting shared responsibility.

SELECTED PROJECTS

Personal Portfolio Website

- Built a multi-page responsive website with dedicated Data, Networking, Leadership and Teaching pages.
- Implemented JavaScript interactions, scroll-reveal effects, animated portrait interactions and a scroll-responsive text band.
- Added project search and category filtering to the data portfolio.

Students' Financial Stress & Academic Activities

- Group academic research at OAU; served as the main data analyst, organising and analysing survey responses from 186 undergraduates and comparing findings with selected studies and an external dataset.

OAU University Analytics Dashboard

- Contributed to a web-based analytics dashboard covering student, staff, income and residential data.
- Worked across dashboard views, interactive visualisation and dynamic page interactions.
- Technology: FastAPI, HTMX, Plotly, Python, HTML and CSS.
